**Import Health Standard**

BIOPRODIC.ALL, 31 Jan 2010, Import Health Standard for Biological Products from All Countries

**Post Entry Type :** Nil

**Special Conditions :**

- All products listed on this permit must be commercially manufactured and packaged.
- If an imported test kit tests for a notifiable organism or a reportable organism, there is a legal requirement to report a positive result immediately to 0800 80 99 66.
  - A positive test kit result for a notifiable organism may be a false positive and is considered only "suspicious" until confirmed at the IDC laboratory.
  - When supplying test kits for exotic diseases to a third party, this party must be informed of the conditions listed above.

**IMPORTANT INFORMATION FOR PERMIT HOLDERS AND AGENTS**

- 1 This permit, and compliance with the provisions of the specific import health standard(s) and/or entry conditions, does not guarantee that the goods you import will be given a biosecurity clearance. There are other restrictions in the Biosecurity Act 1993 which apply to the giving of biosecurity clearance.
- 2 You need to ensure that the goods you import comply with the provisions of the specific import health standard(s) and/or entry conditions. The import health standard may be amended during the course of your permit. Import Management will notify you of any significant changes to the import health standard and will re-issue the permit to accommodate these changes.
- 3 There are a number of other provisions in the Biosecurity Act 1993 which may affect you. If you commit an offence against the Biosecurity Act 1993, heavy penalties under section 157 of the Act might apply.
- 4 Apart from the Biosecurity Act 1993, there are other laws relating to or prohibiting the importation of goods. This permit, and compliance with the provisions of the specific import health standard(s) and/or entry conditions, does not absolve you of the need to comply with these laws.
- 5 Unless specifically identified in 'Description of Items' or 'Special Conditions' of the permit, NO new organisms, including genetically modified organisms, are permitted entry under this permit.
- 6 All cultures must be:
  - clearly labelled with the scientific strain and name
  - consigned in leakproof packaging
  - free from contaminants
- 7 All new organisms must not be opened until received by the nominated containment facility.
